

Attachment 2.

Abstract Scoring Criteria

Scoring Form for the XXX Proposal Abstract					
Review Dimension	Max Score	Description	Scoring Range	Scoring Criteria	Score
Formal Review and Compliance	-	Formal Review	Yes/No	Whether the abstract adheres to the required template format	-
		Compliance	Yes/No	Whether the same research group or corporate department has submitted multiple proposals under different team names with essentially identical content (if so, deemed non-compliant)	
Content	100	Research Foundation	20	Accumulation of AI-driven drug design expertise (e.g., no relevant technical background; background limited to AI algorithm research; background limited to traditional drug design; background in AI-powered drug design)	
		Understanding of the Competition Task	20	Whether the participant demonstrates a deep understanding of the competition task (e.g., understanding of relevant algorithms and datasets potentially required for the competition; familiarity with virtual screening, the characteristics of the competition target; and subtype selectivity)	
		Innovation	30	Whether the selected AI algorithms and overall research methodology demonstrate originality	
		Feasibility	30	Whether the proposed approach, including the AI algorithm, is compatible with the research framework of the competition, executable in each step, and supported by sufficient computational resources.	
Comments					

Note: Original algorithms are encouraged.
